Overview

The 2013 Legislature created a new category of general education revenue called location equity revenue. Location equity revenue is subtracted from a district's referendum revenue and is equalized at the same rate as the second tier of referendum revenue.

Under current law, location equity revenue is equal to \$424 per pupil for districts located wholly or partially within the seven-county metro area, and is set at \$212 per pupil for school districts in greater Minnesota that serve more than 2,000 pupils. For some school districts, location equity revenue is additional revenue. For a second group of districts, location equity revenue provides additional equalization aid and tax relief. For a third group of districts, location equity revenue provides space under the referendum revenue cap.

This bill increases the amount of location equity revenue to \$424 per pupil for all school districts in the state and clarifies the administration of location equity revenue.

Section

- 1 Location equity revenue.** Sets the location equity revenue amount at \$424 per pupil for all school districts in the state.
- 2 Referendum allowance.** Clarifies the calculation of location equity revenue and makes the revenue a permanent part of general education revenue (current law requires an annual calculation of location equity revenue).
